

# RIOPAK ENGINEERS

## Homepage Content Blueprint — Fabrecor-Inspired Visual Structure

**Purpose:** use the supplied Fabrecor Webflow template as the visual and interaction reference, while making the entire message, imagery, products and brand identity specific to Riopak Engineers.

### IMPORTANT DESIGN RULE

Do not reproduce Fabrecor's branding, company claims, construction content, testimonials or statistics. We are borrowing the visual language, section rhythm, typography scale, image treatment, spacing and interaction style only.

## 01 — HERO / OPENING STATEMENT

Visual: Full-screen approved Riopak factory image. Keep the left side visually dark and open for typography; machinery remains the visual anchor on the right.

**Eyebrow:** RIOPAK ENGINEERS

### Primary headline: PACKAGING ENGINEERED FOR PERFORMANCE

Supporting copy: Packaging and processing machinery engineered for accurate, efficient and dependable production.

Primary CTA: EXPLORE OUR MACHINES →

Secondary CTA: TALK TO AN ENGINEER →

Scroll cue: SCROLL TO EXPLORE ↓

## 02 — PROCESS / HOW WE WORK

**Small label:** OUR APPROACH

### Large heading: FROM PRODUCT REQUIREMENT TO PRODUCTION.

Intro: Every packaging application has different requirements. Riopak approaches each solution around the product, pack format, filling method and production objective.

|    |            |                                                                                    |
|----|------------|------------------------------------------------------------------------------------|
| 01 | UNDERSTAND | Product, packaging format and production requirements.                             |
| 02 | ENGINEER   | Select and configure the right filling, weighing, sealing and automation approach. |
| 03 | BUILD      | Manufacture and assemble the machine around performance, accuracy and reliability. |
| 04 | SUPPORT    | Provide technical assistance, service and spares for ongoing operation.            |

## 03 — ABOUT / CAPABILITY

**Label:** ABOUT RIOPAK

### Heading: ENGINEERED FOR PRODUCTION. BUILT FOR RELIABILITY.

Copy: Riopak Engineers designs and manufactures packaging, filling and weighing machinery for a wide range of product and production requirements. Our solutions bring together machine engineering, controlled filling, weighing, sealing and supporting automation in practical production systems.

CTA: DISCOVER RIOPAK →

Visual direction: large factory or machine image with the same editorial image treatment as the reference template.

## 04 — PRODUCT / SERVICES GRID

Label: WHAT WE BUILD

### Heading: MACHINES FOR THE WAY YOU PACKAGE.

Intro: Explore Riopak's core machine categories and supporting solutions.

|    |                    |                                                                                                                 |
|----|--------------------|-----------------------------------------------------------------------------------------------------------------|
| 01 | VFFS MACHINES      | Vertical form-fill-seal packaging solutions for suitable powder, granule, snack, liquid and other applications. |
| 02 | BOTTLE FILLING     | Filling solutions for liquid products with configurations based on product and production requirements.         |
| 03 | FILLERS & WEIGHERS | Auger, volumetric, liquid and weighing-based filling solutions for controlled product dosing.                   |
| 04 | ACCESSORIES        | Supporting equipment and packaging-line components to complete the production setup.                            |
| 05 | SERVICE & SPARES   | Technical assistance, maintenance support and spare parts for continued machine operation.                      |

CTA: VIEW ALL MACHINES →

## 05 — LARGE VISUAL / ENGINEERING STATEMENT

Use a full-width cinematic machinery image with oversized typography.

### Large statement: PRECISION IN EVERY PACK.

Supporting copy: From accurate dosing and weighing to dependable forming, filling and sealing, every machine is designed around consistent production performance.

## 06 — PROOF / STATISTICS

Label: RIOPAK BY THE NUMBERS

Use the same oversized-number visual treatment as the reference template, but ONLY after Riopak confirms the figures.

XX+ YEARS OF EXPERIENCE  
XXMACHINES / INSTALLATIONS  
XX+ CUSTOMERS  
XX+APPLICATIONS / MARKETS

Do not publish XX+ placeholders. Replace with verified company data before launch.

## 07 — FEATURED PROJECTS / MACHINES

Label: SELECTED WORK

### Heading: BUILT FOR REAL PRODUCTION.

Copy: Showcase selected Riopak machines, installations and applications using large editorial project cards. Each card should identify the machine type and application without inventing customer information.

Suggested cards: VFFS Machine • Bottle Filling Line • Weighing System • Custom Packaging Line

CTA: VIEW PROJECTS →

## 08 — INDUSTRIES

Label: WHERE WE WORK

## Heading: PACKAGING SOLUTIONS ACROSS INDUSTRIES.

Use large typography, image-led cards and hover/scroll interaction.

FOOD & BEVERAGE • AGRO PRODUCTS • SPICES & SEASONINGS • SNACKS & CONFECTIONERY •  
PHARMACEUTICALS • COSMETICS & PERSONAL CARE • DETERGENTS & WASHING LIQUIDS • CHEMICALS &  
FERTILIZERS

## 09 — WHY RIOPAK / BENEFITS

Label: THE RIOPAK ADVANTAGE

### Heading: MORE THAN A MACHINE.

|             |                                                                                 |
|-------------|---------------------------------------------------------------------------------|
| PRECISION   | Controlled filling and weighing for consistent production.                      |
| RELIABILITY | Industrial machine construction designed for demanding environments.            |
| FLEXIBILITY | Configurations suited to different products, pack formats and production needs. |
| CONTROL     | PLC and HMI-based operation for practical machine management.                   |
| SUPPORT     | Technical service and spares support for ongoing operation.                     |

## 10 — CINEMATIC MACHINE / VIDEO SECTION

Use a full-width machine or factory video/image section. Keep copy minimal, with the visual doing most of the work.

### Overlay statement: ENGINEERING THAT KEEPS PRODUCTION MOVING.

CTA: EXPLORE OUR CAPABILITIES →

## 11 — TESTIMONIAL / TRUST

Label: CUSTOMER EXPERIENCE

### Heading: BUILT AROUND CUSTOMER REQUIREMENTS.

Use real verified Riopak customer testimonials only. If none are supplied yet, keep this section as a visual placeholder rather than inventing quotes.

## 12 — FINAL CTA

### Large heading: READY TO BUILD A BETTER PACKAGING LINE?

Copy: Tell us what you need to fill, weigh, seal or package. Our team can help identify the right Riopak solution for your production requirements.

Primary CTA: GET A QUOTE →

Secondary CTA: CONTACT OUR TEAM →

## 13 — FOOTER

### RIOPAK ENGINEERS Packaging & Processing

Navigation: Home • About Us • Products • Industries • Projects • Contact Us

Products: VFFS Machines • Bottle Filling • Fillers & Weighers • Accessories • Service & Spares

Address: 51 - OM VILLA, Opp. SSV-2 English Medium School, Dabhoi Ring Road, Vadodara-390025, Gujarat, India.

## SEO CONTENT

SEO Title: Riopak Engineers | Packaging & Processing Machinery

Meta Description: Riopak Engineers designs and manufactures packaging, filling and weighing machinery for accurate, efficient and reliable production across food, pharma, agro and industrial applications.

Primary keyword: packaging machinery manufacturer

Secondary keywords: VFFS machines, bottle filling machines, filling machines, weighing machines, packaging automation, packaging machinery India

## FINAL CONTENT RULE

The homepage should feel like the Fabreco reference in visual rhythm: large typography, full-screen imagery, editorial grids, dramatic transitions and minimal copy. The words, machines, industries, brand and proof must remain Riopak-specific. No fake statistics, fake customers, fake certifications or leftover template text.
